Advanced JDBC

Total points 18/25

The respondent's email (**24cse236.subhamkumarpadhy@giet.edu**) was recorded on submission of this form.

✓ 1. Which ResultSet type allows backward navigation but does NOT reflect database changes made after the ResultSet was created? *1/1

- ○ A) TYPE_FORWARD_ONLY
- ○ B) TYPE_SCROLL_SENSITIVE
- ◉ C) TYPE_SCROLL_INSENSITIVE ✓
- ○ D) CONCUR_READ_ONLY

✓ 2. If a ResultSet is created with TYPE_FORWARD_ONLY and CONCUR_UPDATABLE, what is true? *1/1

- ○ A) It can move backward and update
- ◉ B) It can only move forward but can update rows ✓
- ○ C) It can move backward but cannot update
- ○ D) It cannot update

✓ 3. Which method is mandatory before retrieving an OUT parameter in CallableStatement? *1/1

- ○ A) executeUpdate()
- ◉ B) registerOutParameter() ✓
- ○ C) setOutParameter()
- ○ D) getObject()

✓ 4. What happens if autoCommit is true during batch execution? * 1/1

- ○ A) Entire batch is atomic
- ◉ B) Each statement may commit individually ✓
- ○ C) Batch cannot execute
- ○ D) Batch always rolls back on failure

✓ 5. Which ResultSet type is most memory efficient? * 1/1

- ○ A) TYPE_SCROLL_SENSITIVE
- ○ B) TYPE_SCROLL_INSENSITIVE
- ◉ C) TYPE_FORWARD_ONLY ✓
- ○ D) CONCUR_UPDATABLE

✓ 6. Which ResultSetMetaData method returns total number of columns? * 1/1

- A) getColumnName()
- B) getMetaData()
- (●) C) getColumnCount() ✓
- D) getTableName()

✓ 7. BatchUpdateException occurs when: * 1/1

- A) No records are updated
- (●) B) One or more statements in batch fail ✓
- C) Connection is closed
- D) AutoCommit is false

✓ 8. In transaction management, commit() does what? * 1/1

- A) Ends connection
- (●) B) Permanently saves changes ✓
- C) Deletes uncommitted data
- D) Closes ResultSet

✓ 9. Which isolation level prevents dirty reads? * 1/1

- A) READ_UNCOMMITTED
- (●) B) READ_COMMITTED ✓
- C) SERIALIZABLE
- D) NONE

✓ 10. What is the main performance advantage of connection pooling? * 1/1

- A) Faster SQL parsing
- (●) B) Reduced connection creation overhead ✓
- C) Automatic indexing
- D) Reduced memory usage

✓ 11. In DAO pattern, which layer directly interacts with database? * 1/1

- A) Service Layer
- B) Controller
- (●) C) DAO Implementation ✓
- D) Model

✕ 12. Which is NOT a benefit of ORM? * 0/1

- (●) A) Reduced boilerplate ✕
- ( ) B) Automatic mapping
- ( ) C) Guaranteed better performance than JDBC
- ( ) D) Faster development

✓ 13. Which is true about CONCUR_READ_ONLY? * 1/1

- ( )) It allows row deletion
- ( ) B) It allows updating current row
- (●) C) It prevents modifications via ResultSet ✓
- ( ) D) It reflects external DB updates

✓ 14. When using savepoints, rollback(sp) will: * 1/1

- ( ) A) Rollback entire transaction
- (●) B) Rollback only after savepoint ✓
- ( ) C) Commit transaction
- ( ) D) Delete savepoint permanently

✓ 15. Which method executes multiple SQL statements together? * 1/1

- ○ A) execute()
- ○ B) executeUpdate()
- ◉ C) executeBatch() ✓
- ○ D) executeQuery()

✗ 16. Which statement is true about ORM frameworks? * 0/1

- ◉ A) They eliminate JDBC ✗
- ○ B) They internally use JDBC
- ○ C) They do not require database
- ○ D) They replace SQL completely

✓ 17. If connection pool size is too small, what may happen? * 1/1

- ○ A) Faster response
- ○ B) Reduced memory
- ◉ C) Threads may wait for connection ✓
- ○ D) SQL syntax errors

✓ 18. ResultSetMetaData is mainly used for: * 1/1

- ○ A) Updating records
- ◉ B) Retrieving schema information ✓
- ○ C) Managing transactions
- ○ D) Creating tables

✓ 19. CallableStatement is preferred when: * 1/1

- ○ A) Executing simple SELECT
- ○ B) Running dynamic SQL
- ◉ C) Calling stored procedures ✓
- ○ D) Reading metadata

✓ 20. Which scenario best justifies batch processing? * 1/1

- ○ A) User login validation
- ○ B) OTP verification
- ◉ C) Inserting 10,000 records ✓
- ○ D) Single record update

✕ 21. Write five cursor movement methods * ···/5

next()
previous()
first()
last()
absolute()
